

The Essentials of Advance Care Planning: Who will speak for you if you can't?

Learn why advance care planning is important for all adults and become familiar with advance directives.

This evening offers the chance for reflection as to your goals and values related to health care. You will gain an understanding of the 3 questions involved in choosing a decision maker. You will have the chance to put your wishes in writing. Certified Respecting Choices® Advance Care Planning Facilitators will guide you through the advance care planning process. They will assist with your advance directives and help develop the next steps to be taken. Please pre-register so information can be provided in advance of the session.

Sponsored by Friends of Hospice,
